PROFESSIONAL PROFILE

Software engineering student with enthusiastic stand on the growth of blockchain technologies. Working as a freelance web developer since 2017 on various projects, small projects(websites), as a part of bigger projects in the field of centralized cryptocurrency exchanges and wallets and payroll systems. As a member of the development teams on the projects I have worked on, I have great team relations, on time delivery of tasks, dedication and trust on the impact that those projects make in the community.
